## ***Built for Living***

Here are just a few of the features you'll find on every Monterey.

### ***Fountainhead™ Counters***

The pinnacle of residential interior design - Fountainhead™ is a true solid-surface material. No other type of countertop has the rich texture of real Fountainhead™, and it's easy to clean and maintain. In the Monterey, even the dining table genuine Fountainhead™.

### ***Solid Hardwood Cabinets***

Premium Northwest hardwoods are the only woods used in our cabinet frames and doors. The elegance of raised panels and the sturdiness of our

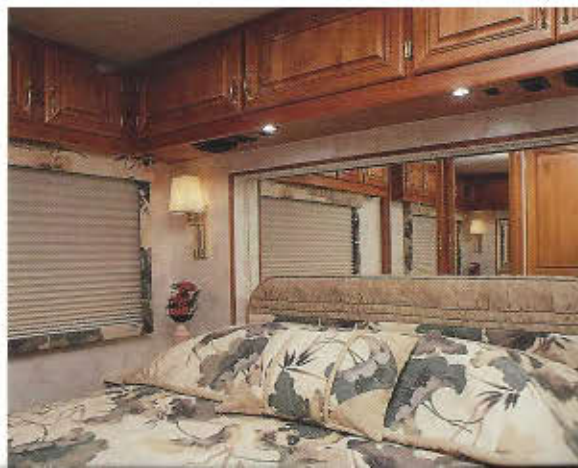

unique building methods raise these cabinets to a higher level of quality.

### ***Large Basement Storage***

Whoever said "You can't take it with you" never saw the Monterey's huge basement. Depending on floor plan, the Monterey provides up to 120 cubic feet of heated and insulated pass-through storage - with no obstructions.

### ***One-Piece Fiberglass Construction***

Banish the worries of roof leaks - the Monterey's single-piece fiberglass roof is seamless and sturdy. In fact, the entire coach is sheathed in fiberglass - smooth, beautiful, and resilient.

The Beaver Monterey is a luxury coach of a distinguished pedigree. Beaver Motor Coaches has over three decades' experience as a coach builder, and has built some of the most luxurious - and expensive - coaches on the road today.

The Beaver heritage shows in the rich designer interiors. Select fabrics and carpets are matched with premium wall coverings for an interior that is elegant, yet comfortable. The liberal use of Fountainhead™ adds to the richness of the decor, yet allows you full opportunity to complete the coach with your own favorite possessions.

Yet the Monterey is also an extremely practical coach. Features such as bright residential lighting and full-power appliances are comforts rarely found in an RV. The power systems are highly advanced, and include a Heart inverter for convenient AC power on demand, large solar panels, and an Onan Emerald™ generator. These systems are all managed automatically for the ultimate in convenience.

In the Monterey, you'll also discover some of the most spacious and efficient floor plans ever devised for a motor home. Exactly what you expect from one of the most experienced RV builders in America.

## The Cat™ Advantage

Magnum, Beaver's sister company and the builder of the Monterey's Blue Streak chassis, is at the cutting edge of engine technology. The new state-of-the-art is called HEUI™, and it adds two new dimensions to diesel power. "Hydraulic Electronic Unit Injection" was developed and manufactured by Caterpillar, and it's the performance advantage shared by the Ford Power Stroke™, the Detroit Diesel Series 60™, and the Caterpillar 3126.

Hydraulic injection means that injection pressure is created hydraulically, instead of from the crankshaft. Fuel pressure is independent of engine speed - and performance at low rpms is dramatically improved. That means faster starts and superior towing and climbing power.

Electronic control means that fuel rate, timing, and other engine parameters are intelligently controlled by an electronic brain. While driving, you can monitor engine performance using Magnum's MagID™ display, including fuel consumption and trip performance. You also have the benefits of an intelligent cruise control that drives the way you would, even in rolling terrain.

The Caterpillar 3126 is the only engine in its class that has these features, and Magnum introduced the 3126 to the RV world. Someday all engines will be electronic. Magnum and the Monterey brings you all the advantages of the best technology to you today.

Here is a galley that's a pleasure to cook in. There's plenty of elbow room in front of the expansive counters. Maximum cooking power comes from a full-power micro-convection oven sits and the residential stove. Under the Fountainhead™ cover is a large stainless steel double sink. Storage is ample in the overhead cabinets and large storage drawers, and many plans feature a smart lazy susan.

## Designed for Driving

Drivers: take your seat behind the wheel of the Monterey and experience what RV driving should be. Take command of the coach, with easy to read gauges and easy to reach switches. Experience panoramic visibility through the huge windshields. Use the six-way power seat and tilt and telescoping wheel to adjust the cockpit to your perfect dimensions. You know the ride will be smooth - it's a Reyco air suspension. Drive with confidence, knowing you have the stopping power of four-wheel disc brakes at your disposal, plus a PacBrake™ engine retarder. As for power - imagine three hundred diesel horses pushing you up the hills.

With the Monterey, the drive may be the best part of the trip.
